Dear Lucy and Mark,

I am writing on behalf of Sion Hill and Summerhill Road RA to give our response to your request for contributions towards the Proforma for the Lansdown LTN.

Our members were informed of the B&NES Liveable Neighbourhood public consultation in September and we encouraged them to respond. Since then, we have participated in local RA meetings and discussions about LTN's. I met with [REDACTED] to walk the area and discuss the various plans that Lansdown Crescent RA wished to put forward towards formulating a LTN.

It was important to obtain the views of our members and with Covid restrictions limiting this, we organised an online survey. This was professionally produced and open from 21st to 29th January. Responses were received from 83 % of our members. We did not seek to influence or steer members one way or the other, but to objectively gather opinions. The survey set out a series of short questions with boxes to tick, on the potential scenarios that had been identified as suitable for LTN projects, such as modal filters or speed calming. As context, it was explained that the aim of these measures would be to reduce traffic to the whole area, although some displacement and other knock-on effects were possible. Space was given at the end of the survey for comments and many comments were added.

I am attaching a document giving the results of our survey. It also includes the position of SH&SR RA in relation to the LTN suggestions that have been put forward by other RA's.

With kind regards,

[REDACTED]
